ICUC CEP roll-over

Currently the Underwater club possesses a Capital Expenditure Plan with the union for the replacement of its compressor. We are proposing that this plan be rolled over for another year as the current compressor that the Underwater club possess is still going strong and very recently passed its annual service. However, the fact remains that the compressor is getting old (we believe it is around 15-20 years old) and it is possible that it could fail unexpectedly, hence the need for a CEP to help the underwater club with such a large expense, which we expect to cost around £15000 in total. We hope that you will see this point of view and allow us to roll our CEP over for another year.

Gareth Naylor and Nick Higginson

ICUC chair and Treasurer 2010-2011
