

Sub-aqua/Underwater Club Merger Proposal
A paper by the DPCS

Background:

On a number of occasions the decision on whether to merge Underwater and Sub-aqua clubs has been discussed. I was actioned by the last meeting of this Board to investigate the claims made by Subaqua relating to whether or not they provide something unique for medics. Underwater Club assured me that in all points they could provide an identical service except that they train on a different day.

Given that Sub-aqua have still failed to submit a Tour Report for the Spring Tour period and also failed to submit a booking form to book pool space for the coming year I would suggest that they will not be providing an additional training session for their members. The research and other differences will be a welcome addition to the current Underwater Club provision of activities.

Decision required:

To merge (or not) Underwater and Sub-aqua.
