During this visit, the group will learn about the project and health and safety measures implemented on the site. This is very beneficial to our members and we believe it will enhance classroom learning and will help us to gain better grasp of different issues faced in such projects. It will also be advantageous for our members during their working life, as having the opportunity to see first-hand how a construction site works, is key to enhancing the design process and enables students to make	20/04/2015	26/04/2015	2	20	0	How are the 15 students picked? What are the
CCCU (bill Eng (604)	SCC Catholic (221)	To help students grow deeper in their faith by letting them to learn about one of the biggest places of Mary's cult in the world. The pilgrimage to the Sanctuary of Our Lady in Fatima will also help students to grow spiritually and experience the real working of God in pilgrims' lives. This will also be an opportunity for students to receive pastoral care and the Sacraments during the Easter break, which often is more difficult for those, who do not have Catholic communities close to their homes.  EWB Sustainable Living Weekend  Aim is to expand the practical skills of members in sustainable rural solutions, and to provide a 'chill out' weekend after term ends.  Over the last decade CivSoc, Civil Engineering Society, has taken around 15 students from each of the four years on an international tour to a destination in Europe annually. The trip is centred around 5 key objectives: oan opportunity for all Civil Engineers within Imperial to experience engineering outside academia oatten diste visits to enhance classroom learning and observe the contrast of sites in different countries obrovide affordable activities for members regardless of their financial background.  OBuild links with European Universities: wider student community oconnects tudents from other years to create a bonded department  We believe that these cover the core aims and objectives of our society as set out by our constitution; to further the academic interests of our members, to promote the subject of the Department beyond the immediate reach of the course and to encourage community within the Department. The destination this year is Bucharest, the capital city of Romania, and this was chosen by students across the department by way of democratic vote. We envision this trip to provide a very beneficial experience for students both educationally and personally. Firstly, the students will be able to visit a current engineering construction site in Romania which will be contrasting to sites in UK both in the construction and in the management of	Tour of the sanctuary  - Votive Mass in the sanctuary  - Talk about the history of the sanctuary  - Sacrament of Confession available for students  - Visiting another place of cult by the seaside, where a miracle took place  - Train travel to and from Rye  - Camping in a woods near Rye, owned by a kind sponsor of EWB Imperial (who happens to be a woodsman)  - Construction of a compost toilet from natural materials  - 1/2 day hike in the Rye area  - Making of charcoal, woodland managem  29/03/15 - The group will fly to Bucharest on a Wizzair flight arriving at the XHostel in Bucharest at around 16:00. In the evening, the group will have a chance to orientate themselves and have a first glimpse of Bucharest. 30/03/15 - University Visit Day. On the Monday the group will have a visit to the Bucharest Technical University of Civil Engineering and have both a talk on their university and a tour of their facilities, as well as a talk from a senior lecturer on the structural engineering issues faced during the design and construction of the Palace of Parliament. This knowledge will be reinforced by a tour of the Palace of Parliament later on in the tour when we will observe the different engineering solutions implemented. In the afternoon, the group will be split in two and will go on a walking tour of the city. 31/03/15 - On Tuesday the group will go on a site visit of a large metro project going on in the city. For this the group will be split in two and everyone will have brought sufficient PPE to comply with the site safety. During this visit, the group will learn about the project and health and safety measures implemented on the site. This is very beneficial to our members and we believe it will enhance classroom learning and will help us to gain better grasp of different issues faced in such projects.
