

Installation of water boilers in the Central Library

Proposed by:

Yi Yang (Gender Equality Officer)

Seconded by:

Wendy Song (Gender Equality Community Engagement Officer)

Cecilia Shi (Gender Equality Community Campaigns Officer)

Silvia Mijangos (Gender Equality Community Welfare Officer)

Riqi Zhang (Environmental Officer)

Ding Ding (Natural Science UG Rep)

Yanda Tao (Engineering PG Rep)

Nathalie Podder (Deputy President (Welfare))

Union Notes:

1. Water machines in central library only provides drinking water with normal temperature and cold drinking water.
2. Hot water could be very helpful in relieving period pain and improve study experience especially in winter.
3. The closest access to hot water in the central library is from the library café. Getting hot water from Central library café is very inconvenient.

Union Believes:

1. It is important to embrace the biological differences and appropriate needs among students.
2. Providing a better learning environment is one of the aims of Imperial College and the central library.
3. Providing hot water in the central library is a relatively simple change that could make a great improvement in learning environment.
4. Students experiencing period would be encouraged to study in central library with hot water provided.

Union Resolves:

1. DPW to communicate with the Central Library and request the following:
 - a. Install a water boiler at every floor in the central library.
 - b. Clean the water boiler regularly and ensure it's safe to use.
 - c. Show clear notice on the water boiler and safety instructions in using the water boiler.
